

EP-980+/DM5/U2

Multipurpose wireless portable PA amplifier speaker system

The strongest and biggest portable speaker ever built. This new EP-980+ wireless portable speaker system is powerful enough for all occasions. No more connecting of multiple speaker systems, as this monster machine will take care of your most demanding audio needs.

The new Titanium Compression Driver can throw your vocals over a distance of 100m with its own dedicated 60Watts amplifier. With another 190Watts amplifier driving the 10" Neodymium Woofer to give a well -balanced sound output.

From proper-centralised pull-up handle, internal storage compartment for transmitters, battery charging indicator, tripod mounting and neat plastic molding design, there is nothing lacking in this new audio companion.

If power is what you need, power is what we are giving.

Retractable Handle and Wheel System

Model	EP-980+/DM5(U2)
Speaker	8 ohm / 1.5" Titanium Compression Driver, 4 ohm /10" Neodymium Woofer (high efficiency)
Receiver module	2 sets of UHF PLL True-Diversity receiver module with 16 user selectable channels
Frequency band	UHF 776-800 MHz
Output power	190W(RMS) / 60W(Class-D+AB Amplifier)
Function	CD-DM5 Player; USB; SD Card; MMC Card
Charging time	12V/5Ah(2pcs) LeadAcid Battery 6-8 hours (for microphone as 1.2V/1.3Ah Nickel-Hydrogen Battery as 4 hours)
Operating time	Averagely 3-8 hours (depending on the volume)
Power supply	100-240V (90-264V) switching power supply
Rechargeable battery	12V/5Ah (2pcs) (for microphone as 1.2V/1.3 Ah x4pcs)
Frame material	Waterproof with plastic steel (P.P Fiber)
Special design	low consumption; automatic charge design for 4pcs/1.2V rechargeable batteries; storage for 2 set of handheld microphone and body pack transmitters; simultaneous power charging with unit operating; the wireless microphone priority; digital echo system; one-touch retractable handle
Dimensions(mm)	500x320x360mm(HxWxD)
Weight	Approx.16-17 kgs
